JUNIOR ROBOTICS

Grades 1-5

21st Century Robotics Enrichment using LEGO® bricks. Each {YEL!} Junior Robotics class follows four basic components:

- **Teach It!**...Each class students are taught the basic STEM engineering concepts behind each project.
- **Build It!**...Students use LEGO® bricks to build an alligator, race car and more.
- **Program It!**...Then they program that project to race, chew, make noise and more using drag-and-drop icon-based software.
- **Play It!**...Finally they play with their project, modify it, create extensions and have fun working with it.

Sign up today to THINK, LEARN and PLAY WELL with {YEL!}.
